

VANDERBILTS CONTROL
THE SOUTHERN PACIFIC

One Hundred Thousand Shares Change Hands and New Interests are in Possession of the Road.

By Associated Press to the Journal.

NEW YORK, Oct. 26.—The Times says: "The Vanderbilts have obtained control of the Southern Pacific system. Negotiations aiming at this accomplishment were begun two years ago, but were summarily disposed of by C. P. Huntington. The property was his, he said, and, owing it, he proposed to keep it. He wanted no alliances which could only in extent make him dependent upon others for which he himself stood. The important deal, to which New York, London and Berlin houses had committed themselves, was disposed of.

"The death of Mr. Huntington brought about a complete change in the situation. The personal equation disappeared. A German syndicate bidding for a large block of the stock in September was not without encouragement that its bid would be accepted for 100,000 shares en bloc at an average of \$42 per share. For reasons which, on a business basis, were considered satisfactory both here and at London, the bid for this 100,000 shares was rejected. The control of the Southern Pacific system, it can now be said, has been obtained by American financial interests not hitherto identified with the property. Conspicuous in the syndicate obtaining the new control are William K. Vanderbilt, E. H. Harriman, James J. Hill, Norman P. Reed and James Speyer, the latter, as the associate of Mr. Huntington, having been conspicuously influential in the direction of the company's affairs for years past."

CHINESE
MURDERERS

To Be Punished By Their Own Government.

SOME OF THEM
KILLING THEMSELVES

All Who Were Responsible for the Outrages are to Be Punished According to Their Degree of Guilt.

WASHINGTON, Oct. 26.—The Chinese Minister has received a dispatch stating that Kang Yi, a member of the cabinet whose punishment is demanded by the powers, died on the 18th; also that Yu Hsien, late governor of Shan Si, who is said to be responsible for the death of many missionaries, has committed suicide.

Railroad from British Guiana to Manaus

WASHINGTON, Oct. 26.—A report from United States Consul Moulton, at Demerara, gives interesting details of the proposed railway from the Atlantic seaboard in British Guiana to Manaus, the flourishing capital of the state of Amazonas, in Brazil. From that city the distances navigable to steamers from Manaus are as follows: To Iquitos, Peru, via river Solimoes, 1,350 miles; to Bolivia via river Parana, 1,080 miles; to Isabel via river Negro, 470 miles; to Bon Vista via river Negro Branco, 400 miles; to San Antonio via river Madeira, 470 miles; to Para via river Amazon, 1,100 miles; total, 4,870 miles.

The establishment of the road at Manaus would break into the center of the entire system of ocean and river transportation between the Andes and the sea and upset the usual course of trade by that route and divert the most of it to the seaport at Demerara.

The line would start at Georgetown, in British Guiana. Manaus is 1,100 miles on the Amazon, from Para, and from Para to New York is 3,245 miles.

"I did not complain when men left us in 1896, for I have always contended that a man's vote was his own and he had a right to do with it as he pleased. (I cannot despise a man who places his country above his party even though I may be the loser by his act.)"

A Melodious Sneeze.
There is more melody in Andreasburg, Prussia, in the Harz mountains, than in any other town in the world. There 250,000 canaries are annually reared, and four-fifths of them are sent to the United States. "Professor birds," perfect singers, are placed among the young birds, so that the latter may imitate the trills of the experienced warblers.

A Two Edged Joke.
Sometimes a joke reacts, as the Bangor (Me.) Commercial proceeds to prove by relating that a young man in Auburn, to play a joke on a barber, paid him 35 old fashioned cents. Later, when he found that the barber had sold one of the coins for \$35, he did not feel so well satisfied with his joke or at least thought it had become misplaced.

The practice of taking arsenic in minute doses is very prevalent among the peasantry of the mountainous districts of Austria-Hungary and France. They declare that the poison enables them to ascend with ease heights which they could not otherwise climb.

THE CONVICTION

Profits On Old Vessels.

By Associated Press to the Journal.
LIVERPOOL, Oct. 26.—The sale just made by Messrs. J. R. Hawes and Co. Liverpool, through Messrs. Kellock and Co. of the sailing vessel Alcedo, to Messrs. R. M. Stoman of Hamburg, provides a most striking illustration of the good pieces which are at present ruling for a second-hand tonnage. The vessel was built nine years ago for 22,000 pounds, and the price paid by her new owner was 25,000 pounds. Messrs. Hawes and Co. who are substituting steam for their sail tonnage, have, therefore, after having had the use of the Alcedo for nine years, sold her for an amount which will, when cost of of transfer, commission, etc., are deducted from the gross price realized, slightly exceed the original price. This is the fifth large sailing ship recently sold at the great rise in prices.
